

# BRITISH AUTOMOBILE RACING CLUB RACE INFORMATION BULLETIN

**BULLETIN No: 02**

**ISSUED: 11.30**

## **Pickup Truck Racing Championship**

### **Amendment to C.R. 5.10.7 Lap Timers**

As the majority of lap timing systems now utilise the GPS system to provide accurate timing it is now permitted to use systems that use the GPS system. Any lap timer must not be mechanically or electronically connected to any of the truck systems other than to provide a power supply is required. The system must not be able to track or log any of the operating parameters of the truck and must be mounted in such a way the driver, with the seat harness fastened, is unable to reach the unit's controls.

Any information recorded by the device must be made available to Pickup Truck Racing on request by either management or eligibility teams. The preferred system is the AiM Solo 2, if any other system is used the software and access codes required to read the information must be made available to Pickup Truck Racing by the team at no cost.
