7. Pit Lane / Wall

- 7.1. The pit lane is divided into two lanes. The lane closest to the pit wall will be referred to as the “Outer” or “Fast Lane” and the lane closest to the pit garages will be referred to as the “InnerLane”.
- a. The only area in the pit lane where any work can be carried out on a car is the Inner Lane.
 - b. Cars may enter or remain in the Fast Lane only with the driver sitting in the car behind the steering wheel in their normal position with their belts fully fastened, with the car under its own power.
 - c. It is forbidden to paint lines on any part of the pit lane.
 - d. No equipment may be left in the Fast Lane.
 - e. No umbrellas or unsecured structures are permitted on the pit wall at any time.
- 7.2. When stopped in the pit lane a car must be parallel parked for all sessions. A car must not be worked on unless stopped in this manner. A car may not have any mechanical adjustments made during the mandatory second pit stop. For clarification, air may be added or removed from tyres during a mandatory pit stop.
- 7.3. Cars are permitted to stop outside any marked garage area.
- 7.4. Given that many competitors do not have pit crews to control the exit of a car from the Inner Lane to the Outer Lane, and the restrictions imposed by HANS devices, **competitors in the Fast Lane must give priority to competitors joining the Fast Lane from the Inner Lane.** Notwithstanding this priority, competitors moving from the Inner Lane to the Fast Lane must make themselves aware of any vehicles in the Fast Lane and be prepared to delay their entry to the Fast Lane if necessary.
