

Travelling to Brands Hatch for our BTCC Touring cars on 11-12th May 2024

Please Note a Traffic closure on the M25 junction 10 9pm Friday 10th May till 6am Monday 13th May

M25

junction 10/A3 Wisley interchange

Announcing our second full weekend closure

We can now confirm that the M25 will be shut between junctions 9 (A243 Leatherhead) and 10 (A3 Wisley) from 9pm Friday 10 May to 6am Monday 13 May 2024

We advise drivers to only travel this stretch if necessary.

This closure involves a different stretch from the closure which took place in March. This time a 19-mile diversion route will be in place which uses the A3 and the A243.

We expect long delays.

Please follow the diversion and do not follow your SatNav. By staying on the diversion route you will not be charged for driving in the Ultra Low Emission Zone. It will also help reduce congestion.

We intend to close the M25 for three more weekends this year. There will be no weekend closures in June but the remaining closures will take place between July and the end of 2024. We will be in a position to announce the date of the next closure as soon as the May closure is over.

This closure is for the installation of a new bridge consisting of 68 beams, each weighing 16 tonnes, and another 4 beams weighing 40 tonnes.

Jonathan Wade, National Highways Senior Project Manager, said:

“This is far from a repeat of the previous closure, as the alternative routes are longer and will be different for over height vehicles and all other traffic.

“Drivers listened to our advice last time which reduced motorway traffic levels by over two thirds and meant delays were limited.

“Our advice again is please only travel if absolutely necessary and make sure you give yourself extra time if you do choose to use the M25.”

The Junction 10 improvement scheme will see an increase in the number of lanes to make journeys safer and new junction layout to improve traffic flow. It will also make it easier and safer to enter and exit the M25, and reduce the pollution caused by traffic jams.

Where can I find out more?

Keep up to date with the project on our website www.nationalhighways.co.uk/m25j10.

If you have any questions, please email M25j10@nationalhighways.co.uk or call our Customer Contact Centre on 0300 123 5000.

Best wishes
