BULLETIN No: 08

ISSUED: 14.05

British Truck Racing Championship

BTRC Competitors are hereby advised that the start procedure for races 2, 3 and 5 will be revised as follows.

When released to the circuit trucks will complete that lap as their "Green Flag Lap" to the race start. The pace truck will leave the assembly area and race trucks will follow forming into the 2 x 2 grid formation. When they arrive at the pit entry the pace truck will pull off and the pole truck will lead the grid on circuit. The red lights on the gantry will then be extinguished to start the race.

Race 4 will use a full green flag lap from the grid following the lunchtime grid walk as originally scheduled.
